USE

How To Sanitize

1. Prepare a 100 ppm solution by filling a 3-gallon container with fresh, potable water
2. Add one EfferSan tablet. Allow tablet to dissolve completely before using solution.
3. Spray surface to be sanitized and allow to remain wet for 1 minute.

EfferSan is a no-rinse sanitizer that can air dry. All treated equipment that will contact food, feed, or drinking water must be rinsed with potable water before reuse.

How To Disinfect

1. Prepare a 1,300 ppm solution by filling spray bottle with fresh, potable water.
2. Add one EfferSan tablet. Allow tablet to dissolve completely before using solution.
3. Spray surface to be disinfected and allow to remain wet for 5 minutes.
4. Rinse thoroughly with water and allow to air dry.

All treated equipment that will contact food, feed, or drinking water must be rinsed with potable water before reuse.
