

4XLA®

Pre- and Post-Milking Teat Dip The Premier Pre- and Post-Dip

Like all Ecolab teat dips, the germicide in 4XLA® is only attracted to mastitis-causing organisms. It ignores teat skin and milkers' hands. The addition of glycerin to this natural formulation makes it the premier teat conditioning pre- and post-dip.

4XLA is the Perfect Pre-dip

Speed of kill is important in pre-dipping. Where iodines can take up to one full minute to kill mastitis-causing organisms on the teat, 4XLA kills in 15 seconds. With 4XLA, you won't have to stand around waiting for your pre-dip to do its job. Protocol tests show 4XLA is even effective against Staph. aureus in a pre-dipping routine. 4XLA is the only teat dip that can make that claim.

4XLA is the Perfect Post-dip

Besides killing incredibly fast, 4XLA replaces the teat's natural "mantle" defense that is removed during milking... for that extra margin of protection. And, like UDDERgold PLUS, 4XLA is a great conditioner, too.

- The Alcide germicide
- Excellent skin conditioning
- 15 to 20 second kill speeds
- Proven effective against Staph. aureus in both pre- and post-dip routines
- Proven environmental and contagious organism control
- Replenishes the cow's natural defense
- Tested in accordance with NMC protocols
- Environmentally safe
