SIRLOIN TIPS

YOUR GUIDE TO
AMERICA'S BEST BEEF GENETICS

Young Sires Offer Foundation for the Future

The Select Sires Young Sire Program lays claim as the longest-running structured program of its kind in the US Beef AI industry. This year several bulls emerged from the Young Sire Program with either impressive records for yearling and ultrasound or outstanding young daughter offspring. These bulls will play an important role in our lineup for several years. The results that our Young Sire Program has generated over time further emphasize the value and importance of getting young bulls proven. This issue of Sirloin Tips will focus on several of our newest young sire graduates.

Volunteer

7AN231 Volunteer has 2-year-old daughters scattered through several of our test herds and they look the same in every herd--they're long-bodied,

sound-structured females with neat, balanced udders and they are designed to stay around a long time.

Volunteer progeny excel for growth and UREA.

*Dillon 2-yr-old daughter
UT-Plateau, TN*

*Dillon 2-yr-old daughter
Mansfield ODOC, OH*

7AN233 Dillon's first daughters calved this spring, plus he was bred to thousands of heifers throughout the country. He generates beautiful females that have fancy udders, plus they exhibit more shape than average

and they're basically medium for frame. **Dillon** will end 2006 as one of our highest selling bulls. **Dillon** is in the top 1% for CED at 14, he's high for both IMF and REA and he sires cattle that are pleasing to the eye. He'll be a leader among our calving ease bulls.

Dillon

7AN239 Raindance is a YSP graduate with impressive genetics for growth and muscle. Equally impressive is his outcross pedigree of Enhancer and Rainmaker 814Z, with no Precision, 036 or Ext. **Raindance**

is just shy of 100 for YW at +97 and is a member of the elite +50 \$B club. He's high for muscle and for marbling and he passes on abundant thickness to his calves.

2X15

7AN238 Rito 2X15 is another calving ease specialist that generates high-volume, easy-fleshing offspring with plenty of muscle and grow. His young daughters are strong, wide-based and exhibit a super cow look. **2X15** is

high for conception and a great customer satisfier. For big-middled, thicker-than-average females with great udder design, consider **2X15**.

Reidsville UPRS, NC*

*2X15 2-yr-old daughter
OSU/ATI, OH*

*Alliance yearling female
OSU-ATI, OH*

*Alliance yearling female
Reidsville UPRS, NC*

7AN241 Alliance is another YSP grad with powerful growth. His pedigree of Alliance 6595 x Bando 155 creates outcross opportunities, plus he offers high growth (top 10% YW) and high muscle (top 10% UREA). **Alliance**

Alliance

sired offspring are big and stout, with extra depth and more than enough capacity. His pedigree blends two of the best 'cow-maker' bulls known in the Angus breed.

Nebraska

7AN243 Nebraska is another super calving ease bull that ranks in the top 1% for CED and is minus for BW. At 80 for YW, this outcross bull does a great job siring classy cattle that are long,

clean and attractive. His yearling daughters were eye-catchers in every young sire herd we visited this spring.

*Nebraska yearling female
OSU Campus, OH*

*Nebraska yearling female
OSU-ATI, OH*

*Sultan 2-yr-old daughter
Mansfield ODOC, OH*

7AN244 Sultan's first daughters calved this spring. This 1407 son sires big, strong cattle that are a touch above average for frame size. He puts a wide top and hip into his calves and his daughters are deep, high-capacity, good-milking cows that will raise heavy calves. **Sultan** is 0 for BW and ranks in the top 10% or higher for \$W, \$G and \$B.

Sultan

Solution

7AN247 Solution is one of our top sellers this year and looks fantastic in the Fall 2006 Angus Sire Summary. Minus for BW and high for growth, **Solution** is the #9 bull in the breed for IMF, plus

he's just under +56.00 for \$B! His ability to add value along with incredible calving ease have made **Solution** a popular bull for both commercial and purebred heifers.
